Business Trunking

Looking to easily migrate to an IP-based solution that is flexible, powerful and affordable – without abandoning your existing communications investment? Look to Business Trunking from Bright House Networks Business Solutions whether you need a TDM or SIP based solution.

Our Business Trunking solution is designed for businesses of all sizes with trunks (channels in TDM and sessions in SIP) for connecting your PBX/IP PBX to the public telephone network – at a significant cost savings. And by offering a single vendor interface for data, local and long distance, you can rely on us for all your internal and external communication needs, delivered over our own high-speed, fiber optic network that supports carrier-grade features and assures unsurpassed compatibility and reliability.

MAXIMIZE YOUR SUCCESS AND ROI

Seamlessly integrating data, local and long distance calling over one cohesive network, our comprehensive Business Trunking solution streamlines and simplifies management procedures – while seamlessly integrating with your existing PBX/IP PBX and handsets equipment. Whether you're a small business or enterprise organization, you can now cost-effectively leverage the advanced network from Bright House Networks to reach new levels of communication performance and reliability.

POWERFUL ADVANTAGES

- Enable unified communications with advanced PRI and SIP based Trunks
- Scalable to fit the needs of your business today and in the future
- Take advantage of staffing spread across remote offices with automatic failover and time of day call routing
- Reduce network-management costs by using a single network for data and voice connectivity
- Maximize existing investment – our PBX Trunk solutions work with your existing voice and data equipment
- Benefit from clear digital transmission, reliable service, and secure connectivity
- Decrease total cost of ownership – we own and manage our network and the terminating connection equipment in your facility, so you don't pay a premium to lease third-party bandwidth or equipment

GUARANTEED RELIABILITY

- Redundant, reliable IP network infrastructure ensures availability and service quality
- Network design maximizes redundancy with no single IP point of failure
- Supported by our fiber-optic backbone, dynamic architecture and 24/7 monitoring by our Network Operations Center
- Robust Service Level Agreements ensure service is always-on and ready to empower your business
